HOUSE OF
TRAINING

The Future is Made of Skills

Muriel Morbé
Chief Executive Officer

A Matter of Curiosity

Curiosity is a precious virtue—a driving force that pushes us to question the world, see it with fresh eyes, and keep marveling, time and again. This mindset deserves to be nurtured throughout life.

After all, everyone who has dared to challenge the status quo and innovate—be they scientists, creatives, policymakers, or entrepreneurs—shares one essential trait: curiosity.

That is why, as the House of Training marks its first decade, we have chosen to put this value at the heart of our message. After ten years, we have gained a newfound maturity, but we have also kept our childlike wonder and spirit of curiosity. This is what we stand for in a changing world—and what we hope to share with you.

And since curiosity means asking questions, the House of Training has posed—and will continue to pose—questions throughout 2025/2026. We will be reaching out to entrepreneurs and business leaders in our podcast, “Le Cabinet de Curiosité”, as well as to the broader economic community in our various speaking engagements. Expect unexpected questions—genuinely curious ones—about the challenges facing the job market.

It’s by staying curious that we’ll overcome these challenges, push our boundaries, and step outside our comfort zones. Curiosity keeps us innovative, effective, and ensures our actions continue to make a meaningful difference.

Artificial intelligence, digital transformation, sustainability, talent shortages, generational gaps... There’s no shortage of topics. But when we approach them with curiosity, positivity, and enthusiasm, they become new opportunities.

With this in mind, and to meet the needs of Luxembourg’s diverse business sectors, our portfolio now includes 315 brand-new training programmes.

Among these exciting new offerings, I would first like to introduce our Higher Education programmes, which make top-tier academic excellence available to Luxembourg companies and the wider public, thanks to renowned institutions such as HEC Liège, ESSEC, ICN Business School, Solvay Lifelong Learning, and the University of Lorraine, to name just a few.

With the support of our partners and a dedicated team, House of Training guides leaders, executives, managers, and all staff toward tailored training solutions. These academic programmes are practical, relevant, and designed to foster talent development and help companies navigate future challenges.

We are also proud to highlight the impressive growth of our artificial intelligence offerings, now featuring sector-specific specialisations in several fields.

We have launched new programmes focused on major topics like Cybersecurity, Governance, and Risk Management.

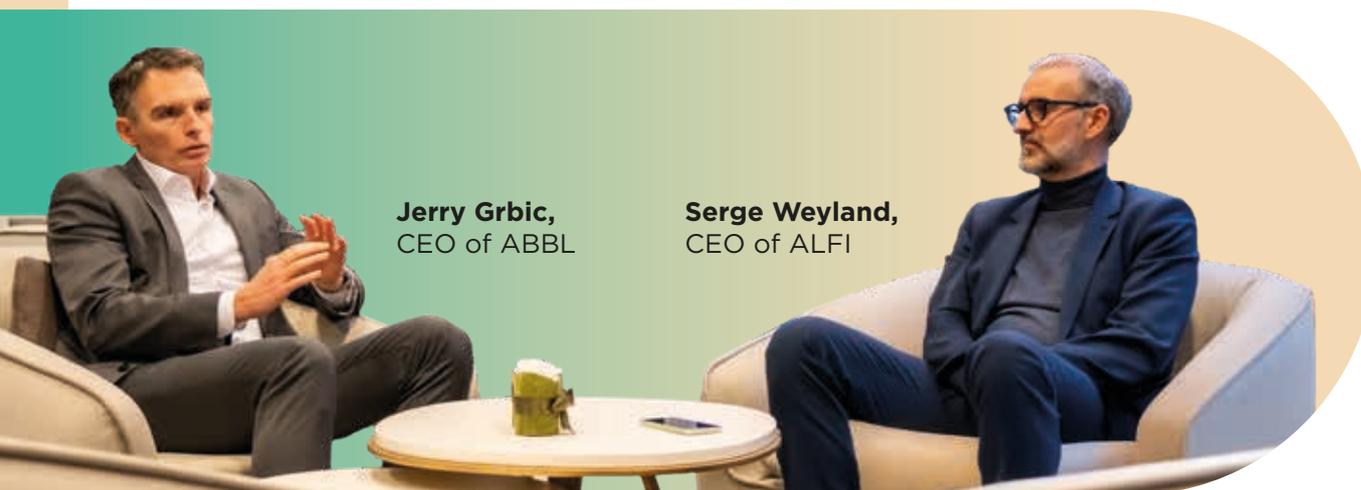

In closing, I want to extend my heartfelt thanks to all our trainers who support us and generously share their expertise with dedication and kindness throughout the year. Your commitment and knowledge are absolutely essential to our success.

Let us also recognise the vital role of our partners, whose expertise and dedication help us identify the needs of various sectors and guide our actions to closely match what the market truly requires.

Our mission would not be possible without the daily efforts of our team members, to whom I express my warmest gratitude. No matter your role, your contributions drive our foundation forward and help us shine both in Luxembourg and beyond.

On behalf of everyone at House of Training, I would like to express our deepest appreciation to our clients—past, present, and future. Thank you for the trust you have shown us throughout this first decade. It is been our privilege to support you over the past ten years, and we look forward to being there for the next ten.

So, stay tuned and above all, stay curious!

Jerry Grbic,
CEO of ABBL

Serge Weyland,
CEO of ALFI

Changing and Training

Cross-Insights into the Banking and Investment Fund Industries

The banking and investment fund sectors are emblematic of the strength and success of Luxembourg as a financial centre. However, these sectors are also facing current market challenges: competitiveness, attracting talent, integrating AI... Challenges that are also opportunities, and to which continuing vocational training provides solid answers.

Interview with Jerry Grbic, CEO of ABBL and Serge Weyland, CEO of ALFI.

In your opinion, what are the main strengths of your respective sectors in terms of the competitiveness and attractiveness of Luxembourg as a financial centre?

Jerry Grbic: I would say it's first and foremost the wide range of services we offer on a daily basis: retail banking, private banking and corporate banking, then the funds-related activities and finally the more recent payments activities with FinTech. I would add that the international perspective that the country has enjoyed since its establishment more than 50 years ago is also a key factor in understanding its impact. Luxembourg embodies a label of quality and trust throughout the world.

Serge Weyland: I agree with Jerry that our strength lies in the diversity of our fund typology. Today, we have fund ranges and asset classes that meet the needs of all types of investors, offering diversification and therefore stability. Our funds are distributed in 70 countries, making Luxembourg the world leader in domiciliation and distribution — a unique ecosystem!

How would you describe the cooperation between the banking and fund industry in the financial centre?

JG: It's a constant and fruitful collaboration, which mainly covers three dimensions: the depositary business and the related compliance and risk management work; the financing business,

the provision and management of liquidity; and finally the retail distribution business for funds, private banking or institutional clients. Since 2006, we have jointly operated a representative office for European affairs in Brussels.

SW: ALFI and ABBL are indeed working together on a number of cross-functional issues, such as regulation and digitalisation, which pose a number of challenges for our respective businesses. We work together to develop new ideas and innovative synergies, and our exchanges are frequent and wide-ranging. As the market is constantly evolving, this regular consultation between our two sectors is essential to anticipate future challenges and to understand and meet new needs.

What are the challenges and opportunities facing your respective businesses now and in the coming years?

JG: The sharp increase in regulation over the last fifteen years has been a challenge. Let's be clear, the ABBL is very much in favour of smart regulation that improves confidence in our industry. Rather, it is the rapid and constant pace at which these new regulations are being introduced that has made banks «suffer». Cybersecurity will be another challenge, especially as digital and AI continue to develop. Luxembourg will not be spared from fraud attempts, but we are reactive and ready to implement what will be necessary.

But, as your question suggests, these challenges are also opportunities, provided we are prepared for them, in other words, trained. Indeed, having new skills means being ready to meet these challenges, whether they are regulatory or technical. It's a real competitive advantage, a real competitive edge.

SW: I would echo Jerry's point about regulatory pressure. I also think that a product mix that has favoured passive management in recent years has been a real challenge, and that trend will continue. Let's be optimistic: Luxembourg has a lot of expertise in passive management and ETFs in general.

As we have seen during the recent period of inflation, the challenge for Luxembourg will remain to continue to produce and provide services at a reasonable cost. In this respect, new technologies will be an indispensable ally, as will the sharing of best practices that already exists between the local players we represent. As Jerry said, and he's absolutely right, updating our skills and training in these new technologies is vital and can tip the balance in our favour. Our ability to progress, innovate and deliver depends on it.

How can the banking and financial sector join forces to address the talent shortage and make Luxembourg more attractive?

SW: The answer is obvious. It's through training that we will find a positive solution to these two major issues. The interactions between the ABBL, the ALFI and the House of Training are numerous and productive. The sectors we represent, such as insurance, are also present in the universities of the Greater Region, in order to present the full range of our professions, but also to create bridges between education and the labour market.

JG: In Luxembourg, we're fortunate in that one in two of our employees comes from abroad, from universities and schools with which we want to establish contacts. They open doors for us and show students where their studies can take them, but above all they interest them in our businesses. But let's face it, the finance sector faces strong competition. Often young people dream of working for GAFAMs. It's up to us to change the narrative and show them the added value of a career in banking or investment funds. In this respect, training is also a strong argument for attracting and retaining talent in our country. Guaranteeing the continuous development of skills - in other words, a dynamic and fulfilling career - is the key to attractiveness and competitiveness.

How do you see roles in your sectors evolving over the next 10 years?

JG: From a technological point of view, it's clear that all recurring administrative functions, such as the back office, will have to be reinvented. More generally, all professionals will have to accept the need to develop new skills and new perspectives. Their profession will change, and that's often a good thing. AI will not make their expertise disappear, but it will allow them to focus on high value-added activities.

SW: Tomorrow, technology will change the way investment products are distributed and «consumed». As a result, the way professions are organised will also change. Automation will accelerate, and talent will need to be familiar with, i.e., trained in, digital tools, with AI in mind. We need to create levers that encourage the adoption of these new technologies.

What message would you like to send to all players in the Luxembourg market on this topic?

JG: We really need to focus on training. In the latest collective labour agreement, signed in July 2024, we increased the budget allocated to training by 10% and emphasised employability. This concept has been reviewed, and we wanted to create co-responsibility between employer and employee. The employer allocates a minimum of 16 hours of training to the employee, but the employee must also take the initiative for his or her own training and thus employability.

SW: I would like to encourage everyone in the asset management industry to have a look at the House of Training's training catalogue. We are fortunate to be able to offer such a wide and evolving range of courses, which respond precisely to the needs of our businesses and enable us to overcome challenges and turn them into opportunities.

Finally, I will add the need for all concerned to remain vigilant, attentive and curious about the changes in the world.

Adapting Skills to Regulatory and Technological Shifts

Continuing vocational training has become a strategic lever for navigating the rapid transformation of the financial sector. With DORA now fully applicable, institutions must reinforce digital operational resilience, strengthen ICT risk governance, and professionalise incident response.

At the same time, the EU AI Act introduces new requirements for transparency, data quality and human oversight in high-risk AI systems. Combined with an intensifying cyber threat landscape, these regulatory and technological shifts place new expectations on boards, managers and operational teams. Training provides the structure to meet these expectations — from supplier risk management and crisis simulations to AI literacy and secure-by-design practices.

For Luxembourg's banking and fund industries, upskilling is not only a compliance obligation but a source of sustainable competitiveness. Targeted learning programmes enable teams to anticipate risks, adopt new technologies responsibly and maintain the trust that underpins the country's financial ecosystem. By investing consistently in continuing vocational training, organisations convert complexity into operational strength, align with evolving EU standards and reinforce the resilience required to thrive in a digital, data-driven market.

A Decade of Impact: Enhancing the Economy and Building Skills

Since 2015, House of Training has worked to make Luxembourg a vibrant, competitive, and appealing economic hub by supporting continuous skills development for businesses, organisations, and their teams. Our commitment: to guide the economy through change, anticipate shifts in the job market, and empower people to seize the opportunities of today and tomorrow.

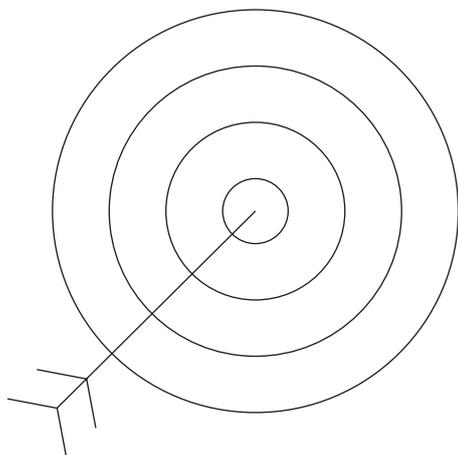

Our Mission

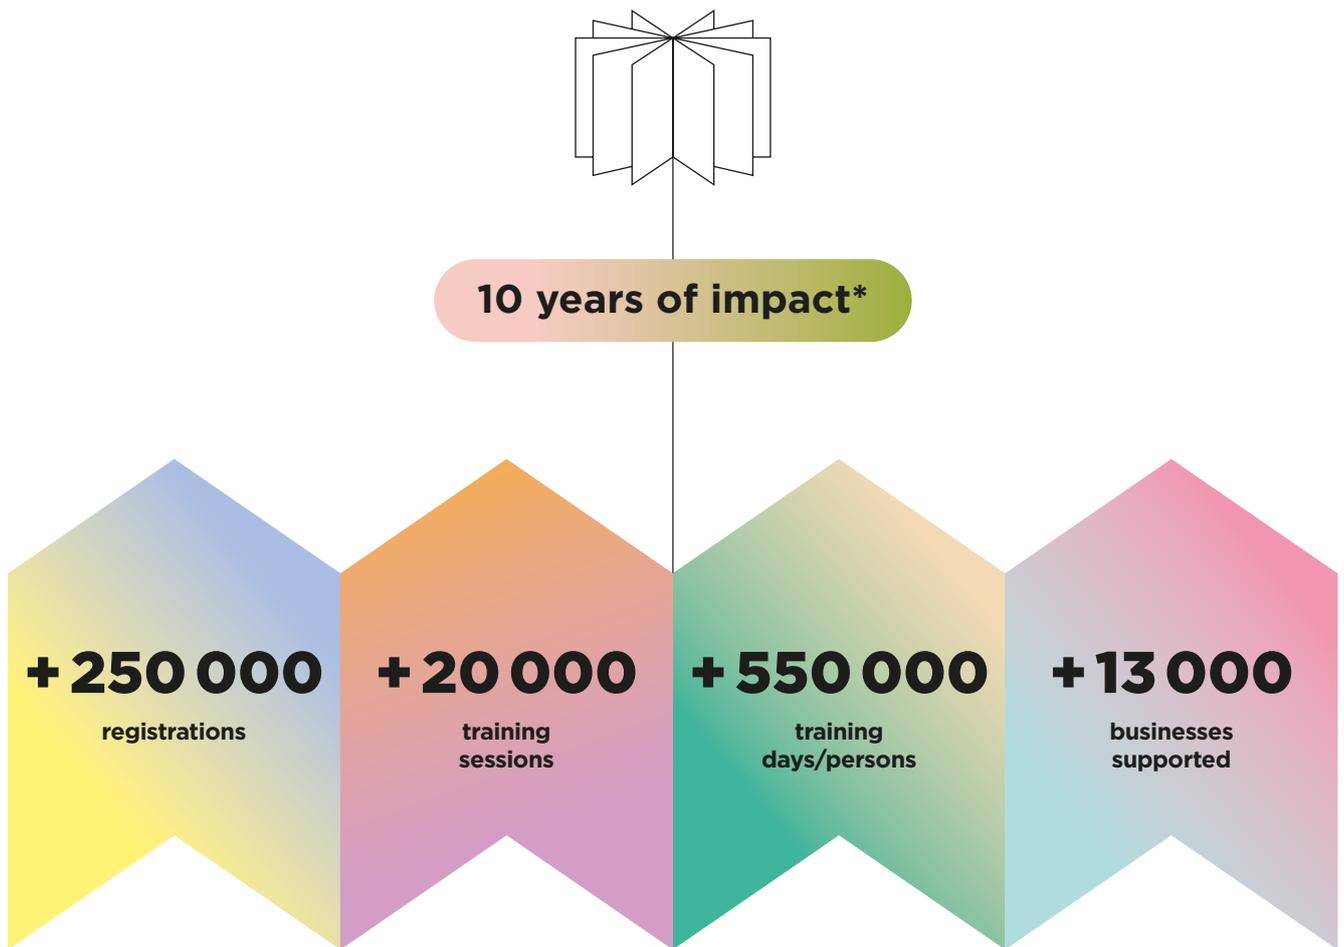

Empower

Grow and strengthen the skills of Luxembourg's businesses by identifying both current and future challenges in the job market.

Guide

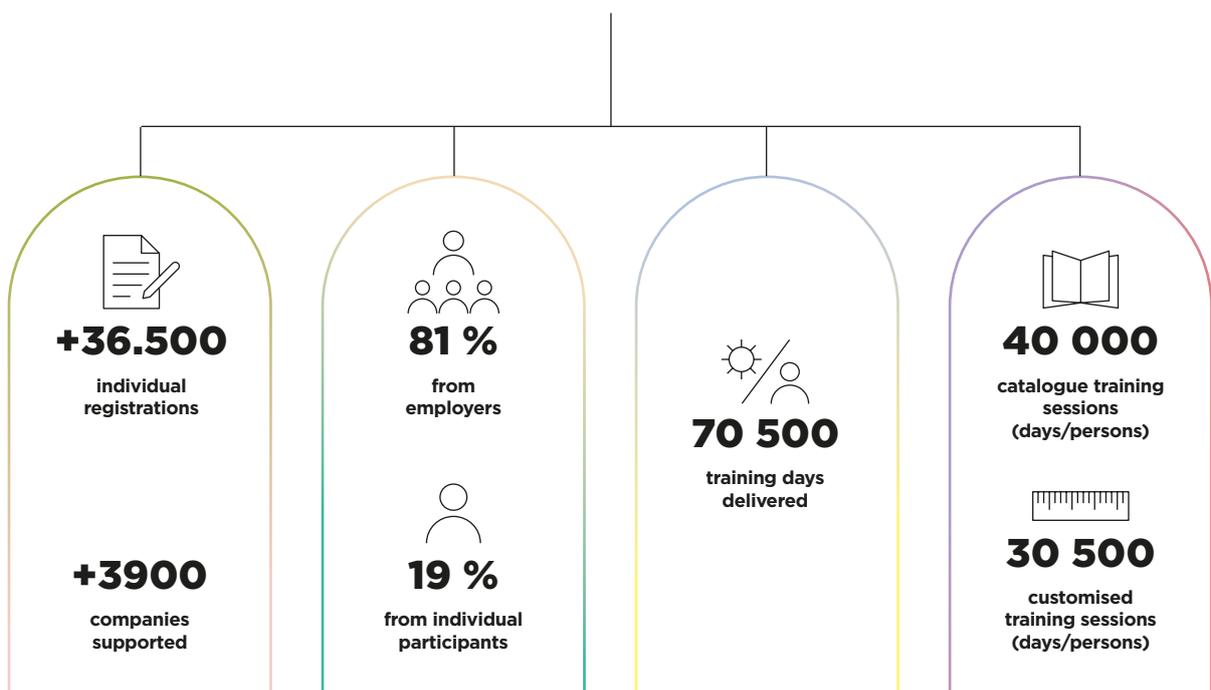

Support companies, their leaders, and their teams as they evolve by equipping them with the skills and tools they need through training programmes and development plans tailored to market needs.

* Figures for 2016 to 2024 and 2025 projections

2025 Key Figures**

** as of 31/12/2025

Meeting Tomorrow's Challenges Starts With Developing Skills

Because the challenges of tomorrow demand collective solutions, we rely on strong beliefs. Our values guide every step we take: collaboration, agility, respect, and excellence in pursuit of real impact.

To celebrate our 10th anniversary, we gave a voice to the people who bring our mission to life: partners, clients, learners, and trainers. We asked them about their needs, expectations, and visions. Their perspectives reflect the changing landscape of required skills and highlight the importance of shared commitment. Every day, our team brings this mission to life with passion and dedication, working closely with all our stakeholders.

Collaboration

To work together effectively and stay ahead of future skills needs, it is imperative that stakeholders quickly connect and set the tone by launching projects that inspire everyone in the sector.

Pierre Hurt
Director, OAI
Partner

Agility

Agility is built on ongoing learning and sharing experiences, so we can quickly pick up new skills and adapt to changes as they come.

Samuel Majerus
Division Director, Environment &
Sustainability - LSC360 Mini MBA
2024 Participant

Respect

The trainer's role is evolving to meet new expectations and real-world challenges. Trainers support learners throughout their journey, making content meaningful while fostering a positive, respectful environment that encourages expression and growth.

Claude Ries
Advisor and
HORESCA Trainer

Excellence

Excellence in training means offering meaningful, practice-focused programmes that build lasting skills and meet business needs. Professional development is not optional.

The Power of Our Ecosystem - Our Network of Partners and Trainers

To fulfill its mission of building and strengthening skills, the House of Training relies on a vibrant, collaborative ecosystem made up of expert trainers and partners from diverse fields.

This dynamic partnership allows us to deliver professional training that is both cutting-edge and grounded in real-world experience, ensuring ongoing skill development and preparing you for today's and tomorrow's economic opportunities.

Over 800 field-experienced expert trainers

Our trainers are specialists in their respective fields, sharing not only technical expertise and real-world experience, but also a genuine passion for learning and professional growth. They are the driving force behind our educational approach, delivering up-to-date, tailored training that meets the evolving demands of the market. Most of our trainers are entrepreneurs, industry experts, or partner representatives, ensuring our programmes are closely aligned with real industry needs. Their hands-on approach, based on the philosophy of 'experts training future experts,' makes sure every session is deeply rooted in the practical realities of each profession and sector.

A network of 60 leading partners in their fields

To keep our training programmes aligned with the latest trends in every sector and to meet new demands while anticipating specific business needs, House of Training works closely with a network of 60 partners. This network brings together key players from our economy—including professional associations and federations, government ministries and agencies, top schools and universities, and service organisations—who all contribute their industry expertise to support innovative, ongoing professional education.

Shaping Training Pathways for Today's Skills and Tomorrow's Challenges

House of Training is here to guide you on your learning journey, offering tailored programmes built around your needs, pace, and ambitions. Once your goals are clear, you'll discover a range of options to grow your skills and unlock new opportunities.

Identifying Needs

At House of Training, we work with our partners and trainers to track industry shifts and job market challenges in Luxembourg. Every company sets its own skills priorities based on its strategy and activities. By blending strategic vision, hands-on expertise, and sector-specific realities, we develop tailor-made training paths designed to strengthen skills, nurture talent, and prepare for the future.

Professional Profiles

Looking to advance in your current role or position?

Across most of our fields, we've defined professional profiles linked to targeted training courses. These help you build a solid career development plan and gain the essential skills for your present or future role.

You will find a list of our professional profiles at the start of each domain.

Skills Blocks

Want to structure your skill-building with tailored training recommendations?

Every professional profile includes skills blocks—core sets of knowledge, expertise, and interpersonal skills to master. Each block contains several courses, guiding you step by step toward complete proficiency.

At the beginning of each domain, you will also find a list of skills blocks matched to every professional profile.

Learner

Training project in mind

Are you a business or organisation with unique training needs?

We work closely with you to develop fully customised training solutions, tailored to your organisation's specific requirements.

Each programme is thoughtfully crafted to align with your priorities, background, and industry-specific needs, ensuring you gain skills that match your unique context and operational challenges.

Have a custom training project in mind? Our team is ready to support you every step of the way and create a proposal that fits your needs.

Higher Education

Looking to advance your career or take on new responsibilities?

Our Higher Education programmes offer advanced academic expertise with a strong practical focus, designed to fit seamlessly alongside your professional commitments.

Developed in collaboration with leading universities and business schools, these courses blend in-depth theory with hands-on practice, empowering you to strengthen your expertise, broaden your outlook, and unlock new career

How to Read the Training Catalogue

House of Training offers a well-organised selection of training courses and simple arrangements to help you plan your learning with confidence.

1 • Training Categories and Fields

We have grouped our 23 domains into 3 main categories.

Support Activities Training

Sector-Specific Training

Personal Development Training

2 • Professional Profiles and Skill Blocks

Each field begins with its related professional profiles and skills blocks. For each skills block, you'll find recommended courses on houseoftraining.lu.

Example

Professional Profiles

Skills Blocks*

Corporate Accountant

> Understand Luxembourg's accounting legal framework

> Apply accounting practices in a business setting

> Master accounting techniques

> Mastering Accounting Tools

3 • Training Programmes and Paths

Within each field, you'll find our full range of training options, complete with useful details such as duration, format, language, partners, and, if applicable, course path type.

Example

Sustainable Finance	Duration hours	Type	Academic or Certification	Language	Reference	Partners
GRI (Global Reporting Initiative) - International Certification in Sustainable Finance	24			EN	BQ024PC	
Sustainable Finance - Foundation	6			EN	BQ020PC	
Your First Steps in Sustainable Finance	2			EN	BQ025EL	
Sustainable Finance and Human Rights	4			EN	BQ150CJ	
ESG Products and Greenwashing Risk Mitigation	2			EN	BQ289CJ	

4 • Formats and Options

You can select the training format that best matches your needs and schedule.

format		Individual Courses	These courses are designed to help you gain specific knowledge or skills. Upon completion, you'll receive either a certificate of achievement (if you pass an exam) or a certificate of participation (for non-exam courses).
		Certified Paths	A set of courses organised with a clear structure and timeline. Developed in partnership with a professional association, these certification tracks award a certificate of achievement upon successful completion.
		Academic Programmes	Programmes developed with prestigious academic partners and leading to a university diploma.
plan		Daytime / Evening Classes	The schedule for each catalog course is listed on our website and will be confirmed after you register.
		E-learning Courses	For e-learning courses, learners can choose when, where, and at what pace they want to study.
		Blended Learning Courses	Blended learning combines online modules with in-person or live online classes. Learners update their knowledge through e-learning in preparation for group sessions.
		Face-to-Face or Distance Learning	In-person courses bring together groups of learners at a set location and fixed times. Remote courses are offered on scheduled dates and times via an online platform. Most of our courses are available in this format.
		Digital Skills	Digital skills empower you to use modern information and communication technologies efficiently and take an active role in the digital transformation.
		Sustainable Skills	Sustainable skills enable you to make a positive, ethical, and responsible contribution to economic, social, and environmental development—helping you get ready for the ecological transition.

Courses are available in French (FR), English (EN), German (DE), and/or Luxembourgish (LU).

Banking

The banking sector is constantly evolving and highly complex, bringing together a wide array of careers that require ongoing knowledge updates. Finance experts agree on the importance of strengthening employees' skills—not just in legal and regulatory areas (such as licensing, compliance, and anti-money laundering), but also in technological, cultural, and operational domains (like digitalization, sustainable finance, in-depth product, client, and process knowledge). The real challenge lies in making the financial sector both attractive and sustainably excellent.

Investment Funds

Luxembourg's investment fund industry stands as a global benchmark, ranking second worldwide. However, industry players must adapt to stricter regulations and ongoing digital and sustainable transformation. To uphold their reputation for excellence, they must continually advance their expertise in key areas like compliance, technology, sustainability, and innovation. Ongoing professional development is crucial to remain competitive among leading financial centers and to meet the growing demands of regulators and investors alike.

Business Organisation & Transformation

A company's performance is grounded in a strong internal structure that connects company culture, leadership, project management, continuous improvement, communication, skills development, and innovation. Relying on proven practices and the right tools, along with a spirit of innovation, leads to true excellence. By mastering management levers, embracing sustainable and digital transitions, leveraging artificial intelligence, and streamlining internal processes, a business can truly stand out. This also boosts its agility and resilience, ensuring it's ready to adapt in a constantly changing economic landscape.

Accounting

Accounting is vital to business management, providing accurate analyses to guide decision-making. Governed by a strict and ever-changing legal framework, it requires professionals who can keep up with regulatory and technological advancements. Ongoing skills development, the use of advanced software, and strong internal collaboration all boost its effectiveness. Non-financial considerations are also included to promote responsible management.

Academic Excellence Supporting Luxembourg's Businesses

House of Training has long been committed to providing Luxembourg's businesses and economy with university-level solutions that align with professional life, supporting the growth of local talent.

In 2024, this momentum led to the launch of a dedicated team tasked with a dual mission.

Facilitate

Empowering and enhancing the skills of **executives, leaders, entrepreneurs, and professionals in transition** to help them navigate and adapt to economic and managerial changes.

Guide

Supporting **leaders and emerging talent** with **certified and degree programmes**, developed in collaboration with academic and industry partners, providing **strategic and operational skills essential for advancement**.

3 learning paths tailored to your development plan

Academic Certificates

Recognized across Europe and internationally, featuring up-to-date content tailored to current issues and enriched with practical experience.

Master's Degrees For Professionals

to the VAPP system (Validation of Prior Personal and Professional Experience).

MBA

(Master of Business Administration)

International MBA accredited by EQUIS and AACSB. Mini-MBA, a fast-track and focused format to quickly master the essentials of strategic leadership.

Topics at the heart of today's challenges

Leadership & Strategic Management

Innovation & Entrepreneurship

Sustainable Transition

Digital Transformation

Finance

And tailored to the pace and needs of working professionals

In the evening

Daytime

On weekend

A unique chance to connect and share with peers and other professionals

Participants enjoy an environment designed for sharing experiences, exchanging best practices, and building lasting professional relationships.

House of Training leverages its teaching expertise and deep understanding of the needs of Luxembourg's businesses to collaborate with top academic partners in crafting programmes that blend academic excellence with hands-on experience. These partnerships are designed to strengthen both the strategic and operational skills of professionals supporting Luxembourg's economy.

HEC Liège

A respected business school, holding both EQUIS and AACSB accreditations.

HEC Liège delivers programmes that combine top-tier academics with strong economic connections, closely aligned with real-world business needs.

ICN Business School

A member of the prestigious triple-accredited schools network (EQUIS, AACSB, AMBA), ICN is recognised for its innovative and interdisciplinary teaching methods.

ICN develops agile managers who are ready to drive innovation in complex environments.

Solvay Brussels School of Economics & Management – ULB

Solvay is a renowned cosmopolitan institution developing high-potential leaders with a comprehensive approach to economics, finance, and innovation.

Supporting professionals as they navigate major technological and societal challenges.

Université de Lorraine – IAE Metz School of Management

A university dedicated to outstanding public and private management.

Offering advanced degree programmes tailored for professionals in Luxembourg.

ESSEC Business School

Ranked among the world's top business schools, ESSEC is a benchmark for executive leaders.

Recognised for financial excellence, ESSEC supports leaders in driving strategic vision and performance.
